<ul style="list-style-type: none">• “Big 12” quality and safety projects• Review of metrics	<ul style="list-style-type: none">• YTD net operating income and margin• Cost transformation	<ul style="list-style-type: none">• Academic health center planning• Kaufman Hall• Clinical scale and community hospital framework

This is our “WHY”

★★★★★ 10 hours ago

We had a minor children's surgery here. I was blown away by how well they handled all the "child" aspects of this. They gave us handouts and a coloring book weeks ahead to teach us how to explain to our kid what would be happening. They gave us a tour a few days ahead of time, and talked him through very specific details of what to expect. They showed him where he could pick out a superhero cape to wear, gave him an anesthesia mask to take home and play with (so he had NO fear of it on the actual day of), showed him pictures of what the doctors would be wearing and what the operating room (OR) looks like, let him sit in an actual prep room, discussed popsicles and tiger pajamas and the race car he would "drive" from the prep room to the OR. The same lady who gave us the tour (Erin, she's amazing) was with him when he went to surgery, and kept him entertained during the few minutes it took for the sleepy gas to kick in. Get this: My kid will tell you today that surgery is fun.

I can't thank them enough for working so hard to turn a scary event into a non-threatening one that my kid remembers fondly, with no trauma or nightmares involved.

“Get this: My kid will tell you today that surgery is fun. I can't thank you enough ...”
